

Unmatched Filling Innovation:

# The RoboCAP RL-200

Being the industry leader with the fastest filling speed, we've earned the trust of over 300 companies for a reason.

Compatible with:

CAPSULES

CARTRIDGES

Fill Confident.

# Unmatched Filling Innovation: RoboCAP RL-200

## The RoboCAP RL-200 is in a category of its own.

Designed for efficient low-volume product filling (up to 5ml) with an impressive +/- 2% filling accuracy.

This powerhouse of a machine requires only one operator, leading to substantial reductions in labour costs. Additionally, it boasts a quick and easy changeover for various SKUs, taking less than 5 minutes.

Its unparalleled compatibility extends to filling all 510's, pods, and disposables. The equipment features a stainless-steel pressure vessel and a heated system designed for viscous oils.

### Affordability

The RoboCAP RL-200 system is priced at 30% less than the competitors' filling equipment.

### Efficiency

Our fully automated system has a filling speed of up to 2,000 units per hour.

### Savings

Save over \$2,000 USD when you purchase the full RoboCAP & MonoPress System together.

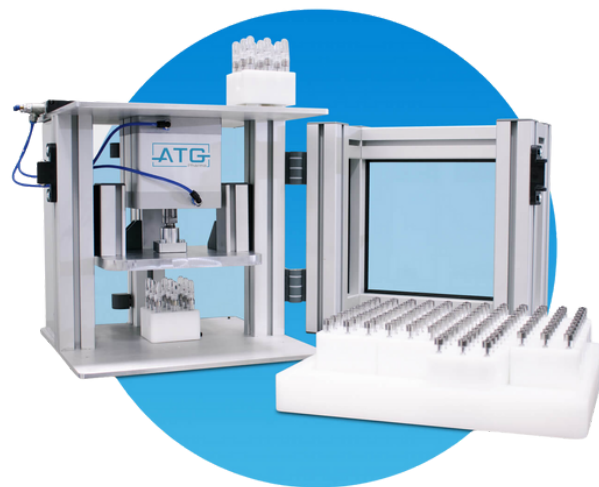

## Features

- ✓ Utilizes backpressure, heat and volumetric displacement to fill highly viscous concentrates.
- ✓ Ability to upgrade to two nozzles.
- ✓ Stainless-steel tanks range from 1L, 1g, 3g, 5g, and 10-gallon in size.
- ✓ Our pre-loaded trays eliminate the need for a vision system or hand loading trays.
- ✓ Quick change over and cleaning in minutes.

# MonoPress

This setup is ideal for filling & capping press top cartridges. The MonoBlox are custom cut for your cartridge sizes and are removable from the MonoTray so that the closing process can begin while the machine continues to fill. This eliminates any chance of leaking, clogging or oxidization. The MonoPress also seamlessly complements our pre-loaded trays, significantly reducing the need for labor-intensive hours.

# Pre-Loaded Trays

Fully compatible with the RoboCAP RL-200 – with our pre-loaded foam trays, you can acquire a 4x increase in filling and capping output. This is a potential savings between. \$0.20 to \$0,60 cents per unit in reduced labour and overhead costs.

Pre-loaded trays arrive in 50 blocks and can be fully customized for blocks of 100, 25 or any size your automation system requires.

## Pricing Chart Comparison

ATG Pharma		Competitors
	RoboCAP RL0201 VF Starting At <b>\$26,500 USD</b>	Filling Equipment <b>\$35,000 to \$90,000 USD</b>
	MonoPress System Starting At <b>\$4,975 USD</b>	Capping System <b>\$15,000 to \$30,000 USD</b>
	Filling & Capping Package Starting At <b>\$29,115 USD</b>	Filling & Capping Package <b>\$50,000 to \$100,000 USD</b>
